

EdgeTech

Fall 2007

Why A Newsletter?

EdgeTech Industries has experienced amazing growth in the past few years. Many times, one of the problems with such record growth is in delivering information to the people who need it most.

It is our hope that this newsletter will give us a format to deliver concise, relevant and timely information to our customers.

If there is information you would like to see included in the newsletter, please e-mail Accounts Management at editor@edgetechindustries.com

100% Commitment

On August 31, all employees at EdgeTech Industries became certified in ESD Safety (ANSI/ESD S20.20 Guidelines). From Production Managers to Purchasing Agents, from Conformal Coaters to Slide-Line Personnel... 100% of our employees are certified. Now that's commitment to quality!

Senior Engineer	563-884-7533

EdgeTech Gets In The Spirit Of The Holidays

Festival of Trees is a big deal around the Quad Cities. This year, EdgeTech Industries is decorating both a wreath and a tree for donation to the event and silent auction. Our employees are making decorations, garlands and toppers for our "CircuiTree". Funds raised help support Quad City Arts throughout the year for visiting artist programs, concerts, art exhibits and school outreach.

New Face

EdgeTech would like to welcome Donna Johnson as Manager of the Quality Department.

Donna has approximately 10 years of quality management in her background, working for companies such as Dell Computer, Raven Industries and Normandy Machine Company. Her immediate goals for EdgeTech are to train and certify all manufacturing personnel to IPC 610 Acceptability of Electronic Assemblies, and J-STD-01 Joint Industry Standards; as well as for rework personnel to be trained and certified in IPC 7711/7721. Donna is a firm believer that training is the backbone of consistent quality. Her number one goal is for continuous improvement of product quality and reliability.

Welcome aboard, Donna!

Survey

EdgeTech is researching adding a custom serialized bar code to each build. This would enable EdgeTech to track each board in regard to quality as well as help you, the end-customer, with internal tracking of boards to your customers.

Please e-mail your answers to the following survey questions to editor@edgetechindustries.com to be entered into a drawing for a Starbucks Gift Card!

My company would welcome bar codes

Strongly Agree Agree Neutral Disagree Strongly Disagree N/A

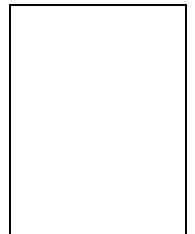

The specific placement of the bar code, on the board, is important

Strongly Agree Agree Neutral Disagree Strongly Disagree N/A

My company would be willing to pay a nominal fee for bar codes

Strongly Agree Agree Neutral Disagree Strongly Disagree N/A
